**Target role:** Senior React JS Developer | Senior Front-End Engineer

## PROFESSIONAL SUMMARY

Senior Front-End Engineer with 10 years of professional software engineering experience with 8+ years focused on building scalable, high-performance enterprise web applications across Banking, Insurance, Healthcare, and E-commerce domains. Specialized in React.js ecosystem including Redux, React Query, GraphQL, and modern component-driven architecture. Experienced in leading UI modernization initiatives, performance optimization, reusable design systems, CI/CD automation, and Agile delivery for enterprise-scale applications. Strong expertise in responsive design, API integrations, frontend architecture, and cross-functional stakeholder collaboration.

## CORE COMPETENCIES

- **Frontend Technologies:** React JS, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS
- **State Management & Libraries:** Redux, Redux Toolkit, Context API, React Query, React Router, React Hooks
- **UI & API Integration:** GraphQL, REST API, Axios, AG Grid, Material UI, Bootstrap
- **Performance & Architecture:** Responsive Web Design, Component-Based Architecture, Performance Optimization, Lazy Loading, Code Splitting, Memoization
- **Build & Development Tools:** Vite, Webpack, Babel, npm, Git, GitHub, TFS
- **CI/CD & Cloud:** GitHub Actions, Azure DevOps, Docker basics, AWS basics
- **Testing & Quality:** React Testing Library, Jest, Error Handling, Web Accessibility (a11y) basics, Storybook
- **Additional Technologies:** BizTalk Server, HL7, XML, XSLT, SQL Server
- **Methodologies:** Agile, SAFe, SDLC, Cross-functional Collaboration

## CERTIFICATIONS

- PL-900 – Microsoft Power Platform Fundamentals
- AZ-900 – Microsoft Azure Fundamentals

## EDUCATION

Bachelor of Engineering (Computer Science)  
Savitribai Phule Pune University, Maharashtra, India

## PERSONAL PROJECT

### Next.js Property Management Application - Learning project

**Technology Stack:** Next.js, App Router, JavaScript, Tailwind CSS

- Built a property management application using **Next.js App Router, JavaScript, and Tailwind CSS**.
- Implemented **routing, layouts, reusable components, and responsive UI** following Next.js best practices.

- Gained hands-on experience with **Server/Client Components and Next.js application architecture**.

## PROFESSIONAL EXPERIENCE

### Senior React Developer | Royal Enfield | E-commerce

**Duration:** Jan 2026 – July 2026

**Technology Stack:** React JS, JavaScript, React Hooks, HTML5, Tailwind CSS, GitHub Actions, React testing library.

- Designed reusable and scalable React component architecture for new bike and variant launches, accelerating future launches by reducing duplicate development efforts.
- Implemented lazy loading, code splitting, memoization and rendering optimizations to improve initial load performance and application responsiveness.
- Developed responsive, mobile-first interfaces using React.js and Tailwind CSS across desktop, tablet and mobile devices.
- Automated patch deployment workflows and product asset updates through custom scripting improving efficiency and reducing manual maintenance overhead.
- Designed and managed CI/CD pipelines using GitHub Actions to automate build, testing, and deployment processes, reducing manual deployment efforts and improving release consistency.
- Maintained minimum 80% unit test coverage using React Testing Library and Jest, enhancing code reliability, maintainability, and defect prevention.
- Collaborated closely with stakeholders and QA teams during sprint planning, feature demonstrations, defect resolution, and Agile delivery cycles.

### Senior React Developer | Snooze StoreFront Implementation | E-commerce

**Duration:** Feb 2024 – Dec 2025

**Technology Stack/CMS:** React JS, JavaScript, GraphQL, React Hooks, Tailwind CSS, Prismic, Shopify, Optimizely.

- Developed Wishlist functionality using reusable product-card based architecture, improving UI consistency and component reusability across modules.
- Built high-performance Product Listing Pages (PLP) handling large product datasets and optimized rendering performance through virtualization techniques.
- Integrated GraphQL APIs with Shopify for dynamic product data management and implemented CMS-driven content rendering using Prismic.
- Designed and executed A/B testing experiments using Optimizely to validate UI enhancements, analyze user interactions, and measure user engagement before production rollout.
- Improved frontend rendering performance through memoization and component optimization techniques, resulting in smoother UI interactions and enhanced responsiveness.
- Mentored junior developers and contributed to frontend coding standards, best practices, and code quality improvements through Pull Request reviews and technical guidance.
- Collaborated closely with stakeholders and QA teams throughout sprint cycles and Agile delivery phases.

### Senior React Developer | Access Care Rostering | Healthcare/Workforce

**Duration:** Jul 2022 – Feb 2024

**Technology Stack:** React JS, Typescript, React Query, Material UI, React Hook Form

- Developed reusable front-end components and integrated REST APIs using React Query and Axios for efficient data management and seamless user experience.
- Implemented reusable custom hooks, form validations, centralized error handling, and application routing to improve code maintainability and scalability.

- Managed CI/CD pipelines and automated deployment processes using Azure DevOps, ensuring smooth and reliable releases.
- Integrated user interaction tracking and analytics events to monitor button clicks, page navigation, and user engagement for data-driven improvements.
- Conducted peer code reviews, knowledge transfer sessions, sprint demos, and actively participated in Agile ceremonies and team collaboration activities.
- Improved application maintainability through reusable component architecture and modular UI design practices.

### React Developer | Intelligent Client Data Verification | Banking

**Duration:** Jan 2021 – Jul 2022

**Technology Stack:** React JS, JavaScript, Redux, React Router, Material UI

- Developed scalable and reusable UI components using React functional components and Hooks to support dynamic and maintainable frontend applications.
- Implemented secure authentication and authorization using Microsoft Authentication Library (MSAL) for seamless user access management.
- Managed application state efficiently using Redux and optimized client-side navigation through React Router.
- Integrated AG Grid and Material UI components to deliver enhanced user experience, responsive layouts, and rich data presentation.

### Power Platform Developer | My Talent for Community

**Duration:** Oct 2021 – Apr 2022

**Technology Stack:** PowerApps, Power Automate, SharePoint

- Developed an internal CSR management application using Microsoft Power Platform to streamline employee engagement and community activity management.
- Automated business workflows, notifications, and approval processes using Power Automate, reducing manual effort and improving operational efficiency.
- Integrated SharePoint and Microsoft Teams notifications to enable seamless communication and real-time collaboration across teams.

### React Developer | Global Reporting Hub | Insurance

**Duration:** Jul 2020 – Jan 2021

**Technology Stack:** React JS, JavaScript, Redux, SCSS, Bootstrap

- Focused on developing reusable and scalable React functional components with strong emphasis on performance optimization, maintainability, and clean architecture principles.
- Implemented React Hooks-based architecture with Redux state management to build scalable and maintainable frontend applications.
- Designed responsive and reusable UI components using SCSS variables, mixins, and modular styling patterns for consistent user experience across devices.
- Collaborated closely with QA teams to identify, troubleshoot, and resolve defects, improving overall application stability and quality.

### React Developer | High Frequency Claims – Property & Casualty | Insurance

**Duration:** Jun 2018 – Jul 2020

**Technology Stack:** React JS, JavaScript, Redux, SCSS

- Developed insurance claim management modules using React and Redux to deliver scalable and user-friendly frontend solutions.

- Implemented dynamic form validations using React Hook Form and integrated REST APIs using Axios for efficient data handling and seamless user interactions.
- Performed unit testing using React Testing Library and Jest to ensure application reliability, code quality, and stable feature delivery.

### Software Engineer | Business Rule Manager | Healthcare

**Duration:** Oct 2017 – May 2018

**Technology Stack:** React JS, Redux, Bootstrap

- Developed reusable UI components and integrated REST APIs using Axios to support scalable and maintainable frontend applications.
- Collaborated with QA teams for defect analysis, issue resolution, and continuous application enhancements to improve overall product quality.
- Managed source code versioning, build management, and release activities using TFS to support smooth development and deployment processes.

### Software Engineer | HCA – Facility Onboarding | Healthcare

**Duration:** Nov 2016 – Oct 2017

**Technology Stack:** BizTalk Server, HL7, XML, XSLT, SQL Server

- Developed BizTalk orchestrations, schemas, mappings, and custom pipelines to support enterprise healthcare integration workflows.
- Managed HL7 healthcare integrations, deployment activities, and data transformation processes to ensure reliable system communication.
- Actively participated in Agile SAFe ceremonies and collaborated with offshore and onshore teams for successful project delivery and coordination.

### Software Engineer | HCA – Automation | Healthcare

**Duration:** Mar 2016 – Nov 2016

**Technology Stack:** BizTalk Server, SSRS, SQL Server

- Developed automated SSRS reports and scheduled reporting workflows to streamline business reporting and improve operational efficiency.
- Gathered and analyzed business reporting requirements while collaborating with QA teams for defect resolution and reporting accuracy improvements.
- Managed deployment activities and coordinated client communications to ensure smooth release execution and stakeholder alignment.

## KEY ACHIEVEMENTS

- Honors for CARING Cheer board Nominations – Individual and Team Recognition.
- Received multiple client appreciation awards for delivery excellence.
- Delivered enterprise React applications across Banking, Insurance, Healthcare, and E-commerce domains.
- Led reusable component architecture initiatives improving UI consistency during code review interactions.
- Contributed to CI/CD automation using Azure DevOps and GitHub Actions.
- Successfully handled client demos, sprint showcases, and stakeholder communication.
